

**Amendments to the Specification:**

Please amend the specification as follows:

Please replace first full paragraph on page 21, lines 18-28, with the following rewritten paragraph:

The correspondences between the information type identifiers and the media access control identifiers may be changed in time. For example, Fig. 3 shows that the media access control identifier “#3” currently corresponds to “multicast-1” and “group ID-1” but it can also correspond to “multicast-2” and “group ID-2”, or “multicast-3” and “group ID-3” at other moments. The correspondence can be changed according a prescribed rule such as that for cyclically changing the correspondence among these three whenever the radio ~~bast~~ base station 100 transmits the media access control frame 400, for example.
